Popular AI Tools for Everyday Use

1. ChatGPT

   - The McDonalds of AI -- it's everywhere!
   - Access: https://chat.openai.com

2. Claude

   - Anthropic's AI. You may find that you prefer either Claude's style, or ChatGPTs.
   - Access: https://claude.ai

3. Poe

   - A platform that lets you interact with multiple AI assistants, including ChatGPT and Claude, all in one place. (Great when you run out of credits for the day on one of the other sites!)
   - Also does some basic image generation
   - Access: https://poe.com

4. Bing Image Creator

   - Generates creative images from text prompts. (Requires login to a Microsoft account, free to make one)
   - Access: https://www.bing.com/create

5. Suno AI (Music & Audio)

   - This one's different -- it creates songs (both instrumental, and with lyrics). You can let it write the lyrics, or write your own. Limited free use per day (try the free v4 song generation)
   - Access: https://suno.ai

The Three Keys of Prompting
1. Who are you?
2. What are you doing?
3. Why does it matter to you?

Example:

```
I'm a first year Java programming student. I need help with user input, because I
don't understand how the Scanner object works.
```

Will give you much better results than:

```
why doesnt Scanner work
```
